

GLPI MAC Agent

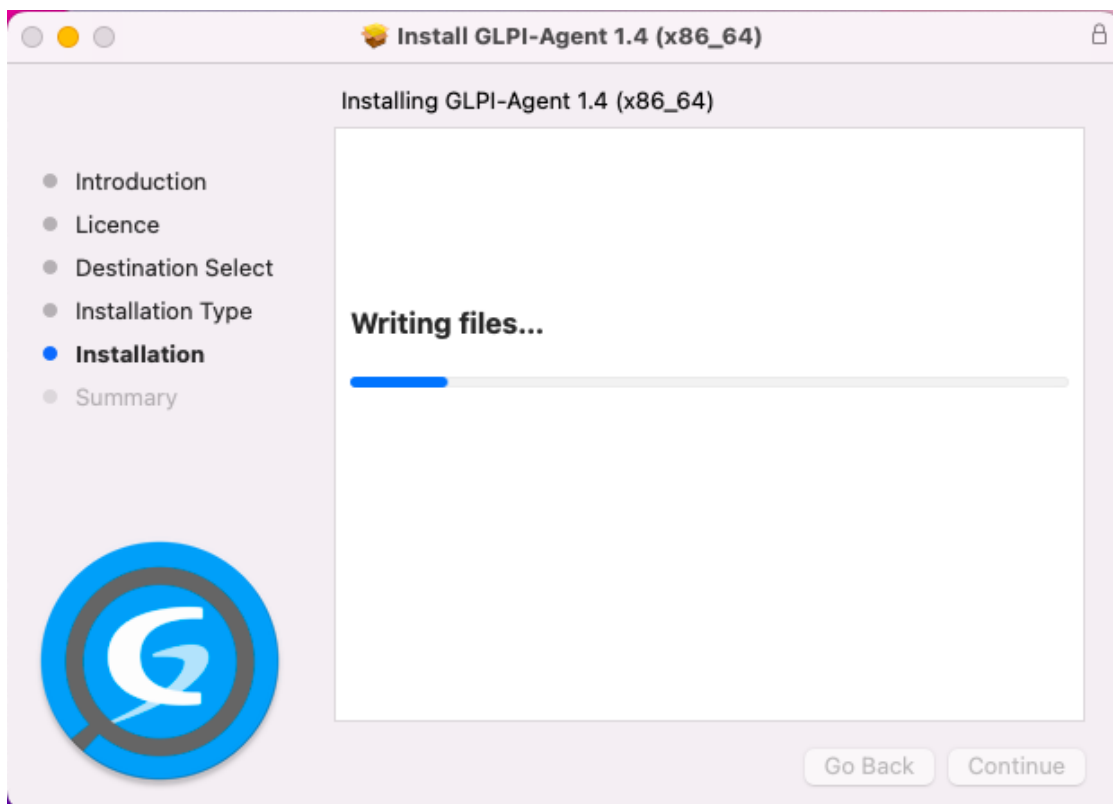

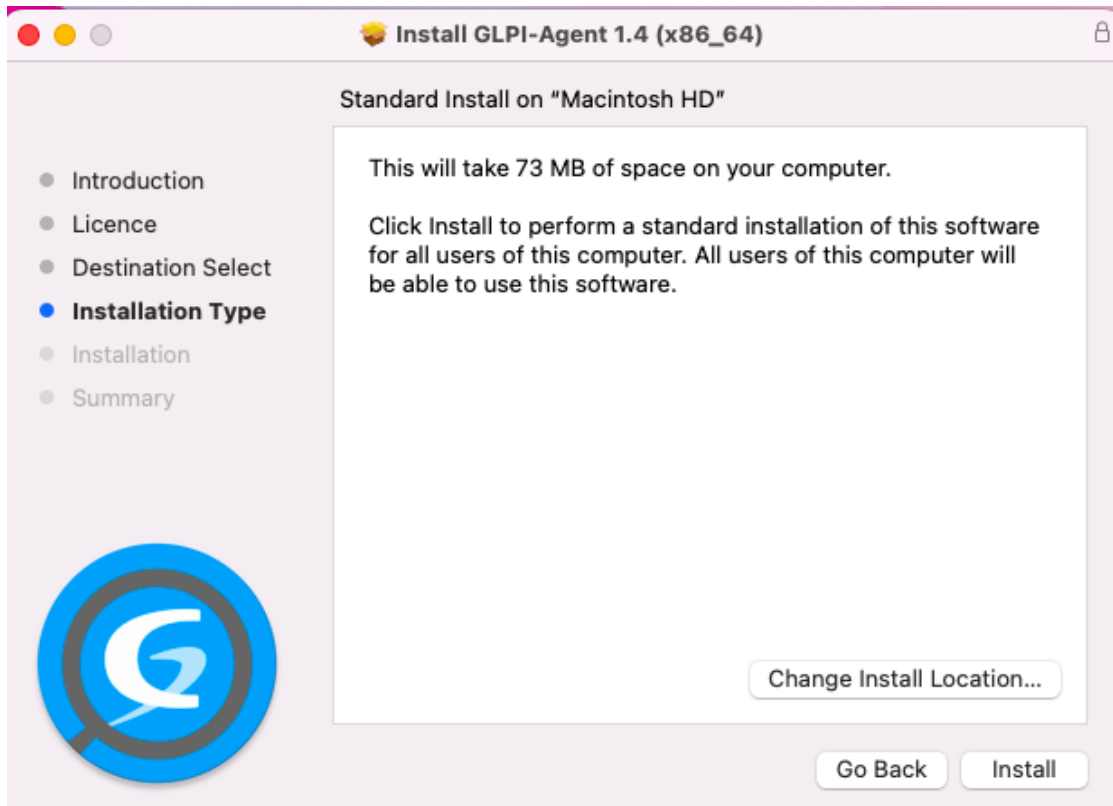

Download GLPI Agent for MacBook as per hardware (Apple Silicon or Intel)

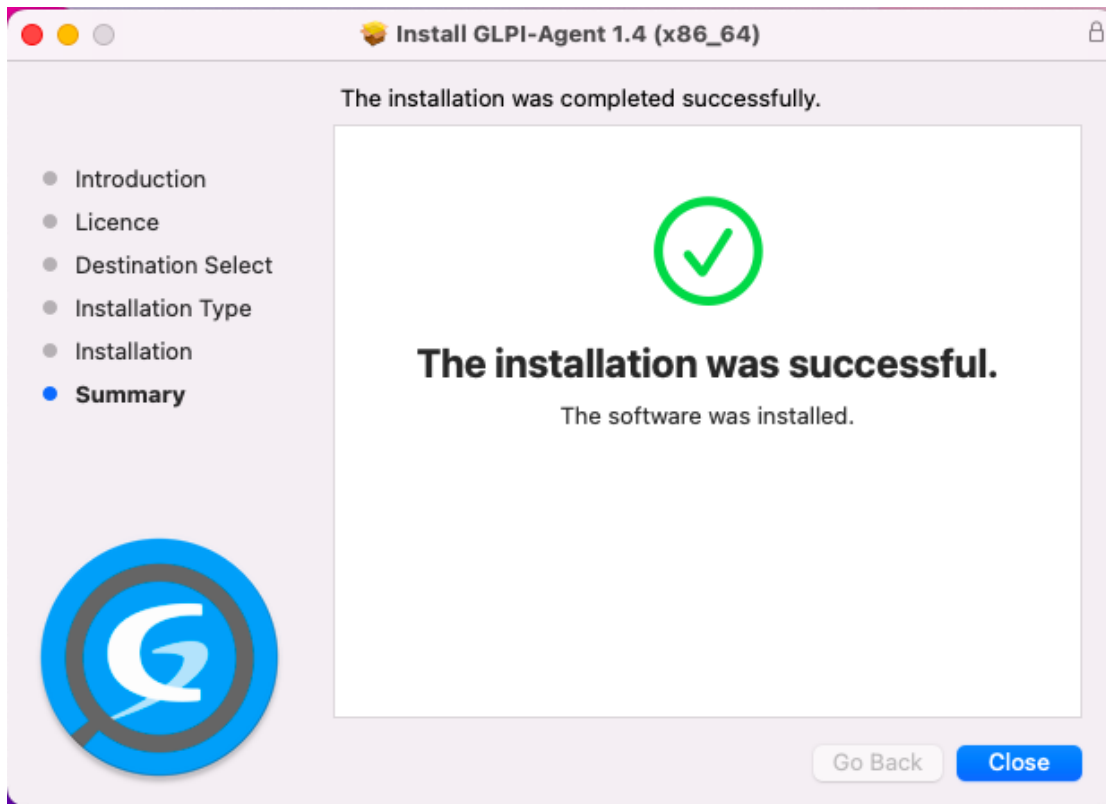

Download Apple Silicon agent [here](#)

Download Apple Intel agent [here](#)

After successful installation kindly complete below procedure.

1. Login to your machine as a normal user
2. `sudo -i` // to become root user

```
tifrcc@TifrCC-MacBook-Air ~ % sudo -i
```

3. Go to Directory `/Applications/GLPI-Agent/etc/conf.d/`
`# cd /Applications/GLPI-Agent/etc/conf.d/`

4. Create new file **local.cfg** and add below lines

```
# vi local.cfg  
server = https://inventory.tifr.res.in  
tag = Firstname-Lastname_CCODE
```

5. Run below commands as root on MAC terminal

```
# launchctl list | grep glpi  
Output: - 1 org.glpi-project.glpi-agent
```

```
# launchctl start org.glpi-project.glpi-agent
```

6. Check for glpi-agent.log under /var/log

```
# cd /var/log/
```

```
# tail -f glpi-agent.log
```

```
